Oral preparation and poster For oral presentation, authors are asked to prepare a series of slides for a conversation of 15-17 minutes. For the presentation of the poster, the walls available for posters are 2,40 meters-tall and 1 meter wide. Authors can produce posters with horizontal or vertical orientation, since the limits are respected. Copyright Submission Authors whose document has been accepted for submission in SCIA 2017 must download and fill out the Springer copyright form, necessary for publication in the Springer procedure. The form of copyright must be compiled as follows:- Title of the Book or Name of the Conference: SCIA 2017.- Volume Editor(s): Robert Jenssen, Puneet Sharma, Filippo Maria Bianchi. Title of the Contribution: title of the document submitted to SCIA 2017.- Author(s) Name(s): complete names of all the authors of the paper presented at SCIA 2017.- Name, address, affiliation and e-mail of the corresponding author: information of the corresponding author of the paper presented at SCIA 2017. The author form must be signed by the corresponding author of the card and the three boxes must eventually be checked, only if one of the categories applies. Once the module is filled, it must be scanned and converted into a PDF file, which must be sent along with the files necessary for the ready version of the camera of the manuscript, before April 4. The copyright form can be downloaded here. The ready presentation of the cameraPapers accepted for the presentation must be sent back by 4 April to this link. Submission must consist of 3 different files:1) source files (LaTeX or Word) of the revised version of the manuscript. If the manuscript is written in LaTeX, you need to make sure you provide all the figures, bibliography and additional manuscript files needed to fill out the final PDF. All filesbe included in a single ZIP file;2) a separate file containing answers to reviewer comments, explaining how you faced their critics and suggestions in theversion of the manuscript;3) a signed version (in pdf) of springer copyright, available for download at the link above. the card will be accepted for oral presentation and poster. the maximum length allowed for a document is 12 pages (single column,) including references and appendices (if present.) paper submissions are not anonymous, i.e. authors should write their names and their affiliates in the document presented. how to submit a document documents can be presented following this link. we accept the presentation of pdf paper format full of a maximum size of 20mb. the abstract part of the full card should not exceed 250 words and is strictly limited to having a number of characters below 2000. Further presentation instructions will be displayed during the presentation procedure, following the link above. paper preparation for your convenience, we summarized in the author's guide document how a procedure document should be structured, such as items (headings, figures, references) should be formatted using our default styles, etc. we also give some information about how your card will be of type a springer. pdf of the authors' guidelines can be downloaded here. cards can be presented in latex or word. latex2e format: we want to add hyperlinks to the manuscript in the online version, so we recommend the latex2e ooo to prepare the camera manuscript, along with the corresponding springer class file. the zip archive with the latex model and its instructions can be downloaded here. latex: We also provide the latex2e source file of "author education," which can serve as additional sample input. zip archive, which contains a separate latex file for text and eps file for figure, can be downloaded here. word 2007: notuse of Microsoft Word, especially as the layout of pages (the location of figures and paragraphs) can change between prints. However, we provide the relevant model. Please readInstructions for explanatory typing "SPLNPROC Word 2007-2010 Technical instructions.pdf" contained in the ZIP archive carefully. The model can be downloaded here. Word 2003: A document model was prepared by Springer for use with Word 2003. The default style formats are available for all types of content that are part of a computer procedure document, and these formats can be easily accessible through special toolbars. The ZIP archive with the model can be downloaded here. Original search documents Research documents should not be published or submitted for publication elsewhere. Preprints (such as Arxiv) are allowed. Double sending It is possible to present a document currently under consideration at other conferences, while the final decision of its acceptance is still under review. In this case, the authors must notify their final decision by 10 March 2017. Other deadlines apply according to the dates set. Proceeding The documents accepted for the SCIA 2017 conference will be published in the conference notes in computer science, Springer. In the paper version, all figures will be black and white. Publication of the newspaperAuthors of the best documents will be invited to present extended versions (at least 30% of the new contents) of their work to be appreciated for the publication in a Fast Track presentation process of the newspaper Elsevier Applied Soft Computing (ASOC). ASOC is an international magazine and the Fast Track event strictly follows peer-review standards. standard.
